

MIDITEC

Access Control – Time & Attendance – Room Automation

MIDITEC Solutions

Hardware and software solutions from a single source

Access Control

To control the access of several persons at different times and/or to different areas, there is no alternative to an electronic access management system. And to get a maximum of security, comfort and efficiency, you have to go for MIDITEC.

- Control of doors, locks, barriers and elevators
- Visitor administration
- Car park management
- Locking systems
- Barrier control

Building Security

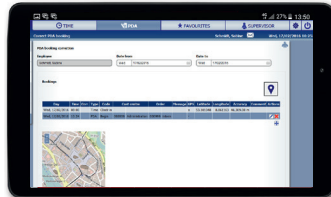

People, buildings and property are the core of each successful company. This is why you should lay the protection and safeguarding of these factors into the hands of an experienced partner. We offer building security from a single source: From planning to operation and maintenance.

- Burglar alarm technology
- Hazard detection technology
- Area changeover control
- Dual-control principle
- Anti-passback
- Logging

Time Recording

Our time recording systems allow to record and plan working times flexibly. Shifts and overtime can just as easily be considered as flextime, absences or tariff target times. The working time models of our software are freely configurable and can be individually adapted to your company's needs.

- Operating data acquisition
- Working time models
- Data import to payroll accounting programs
- On-call duty
- Mobile time recording
- Extensive evaluations

Room Automation

Security is a compulsory, service a voluntary exercise to the pleasure of your guests and your personnel. With the modern MIDITEC room automation solutions you can offer your guests additional comfort and at the same time demonstrate environmental awareness, reduce energy costs and make the daily work easier for your personnel. Functions, such as “Do not disturb (DND)”, “Make Up Room (MUR)” and “Check Minibar” as well as the simultaneous notification of the reception when the room cleaning is finished, provide for an efficient workflow and enable a first-class, discreet service.

- Facility management
- Lighting management
- Air-conditioning
- Energy efficiency

MIDITEC is one of the leading manufacturers and suppliers of hardware and software products in the fields of access control, time recording, building security and room automation.

We offer the whole range of relevant components for online and offline systems, from electronic locking cylinders and fittings to access readers, terminals and universal control units as well as to complex building security systems. All MIDITEC hardware and software components are perfectly matched to one another and can mainly be combined to your choice.

We will be pleased to advise you
